JIANG DICTATOR FOR LIFE

His current preeminence is based on new theory articulated in the 1997 Communist Party  
Congress:

keeping stability while maintaining high  
economic growth; speeding up the pace of national  
unification; raising the PLA's combat standards to world

levels; and an activist foreign policy. In addition the following:

"wholly state owned economy" with other forms of ownership through developing share  
holding companies and firms with foreign and private capital.

Chinese TV says that he has transcended Ding and Mao.
